COGNITIVE HEALTHCARE

Cognitive healthcare, connected around people.

Products, technology and implementation support

Cognixoft brings together cognitive health, care and rehabilitation, wellbeing, and research as a company direction.

Confirmed implementation areas / Development previews / Planned business directions

Four areas of focus

01 Cognitive health

Understanding individual needs and the workflows around professional review.

02 Care & rehabilitation

Coordinating goals, responsibilities and continuity around professionally agreed support.

03 Wellbeing

Making everyday planning, participation and accessible information easier to explore.

04 Research & innovation

Organising study data, technical workflows and reproducible examples.

Company focus areas describe the Cognixoft direction. This brochure does not offer clinical appointments, rehabilitation programmes or therapeutic outcomes.

Products at different stages

Cognixoft Health

Development preview for assessment administration, professional review, versioned reports and follow-up.

Eight concepts with working local examples

Cognixoft Care

Create a goal and task

Cognixoft Companion

Build a daily plan

Cognixoft Research

Explore a study data dictionary

Cognixoft Rehab

Draft placeholder plan content

Cognixoft Everyday

Create and reorder routine steps

Cognixoft Learn

Read three product-orientation lessons

Cognixoft Pathways

Create shared support goals

Cognixoft Practice Kits

Choose a non-assessment planning template

Fourteen planned business directions

Platforms; specialist services; physical products; education and publishing; clinical partnerships. Each direction requires its stated delivery expertise and operating arrangements before launch.

All local product examples use fictional sample data and are not validated for clinical use. A working preview does not establish release, therapeutic benefit or clinical approval.

Implementation support

Set up a product

Agree the configuration, prepare the workspace and check the agreed tasks.

Connect your systems

Map an agreed data flow and verify the connection in a test environment.

Move data with a plan

Define the mapping, rehearse the move and reconcile the agreed records.

Prepare your team

Practise agreed product tasks and leave the team with useful guidance.

A scoped engagement

Agree the intended task, named contacts, inputs, dependencies and acceptance checks. Review a written proposal before delivery; finish with an agreed handover.

Prices, dates, capacity, support terms and third-party costs require a written quotation. This brochure makes no delivery commitment.
