DEVELOPMENT PREVIEW

Cognixoft Health

A software development preview for assessment administration, professional review, versioned reports and follow-up.

Who it is for

Professionals and organisations exploring assessment administration workflows

What the preview lets you explore

- Explore assessment administration and review screens
- Follow a versioned report workflow
- Discuss intended use and implementation requirements

How it differs

Assessment administration and professional review; the wider family explores coordination, personal planning and related workflows.

Development preview with fictional sample data. Not validated for clinical use; no diagnosis or clinical approval.

Next development step: Agree intended use, assessment rights and professional oversight before real deployment.
