CONCEPT / LOCAL PROTOTYPE

Cognixoft Rehab

Keep agreed goals, activity assignments and review checkpoints connected.

Who it is for

Rehabilitation professionals and people using their guidance

What the preview lets you explore

- Draft placeholder plan content
- Simulate review and freeze a plan version
- Record completion separately from the published plan

How it differs

Keeps plan versions fixed. Care coordinates responsibilities around the wider team workflow.

Administrative prototype with sample placeholders. No therapeutic exercises or treatment advice. Fictional examples. Not validated for clinical use.

Next development step: Establish professional partners, content rights, intended use and evidence requirements.
